

Prabandhak Version 2.5

a product of Reverie Language Technologies

Release Notes

Released on: November 11, 2021

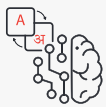

We constantly work to improve your user experience on Prabandhak, here's a summary of what's new, enhancements, and bug fixes made.

New Features

Unlimited Project Creation & Use

create as many projects as required & use the platform limitlessly

One-Click NMT

apply NMT on project creation stage to reduce translation efforts, helping users go-to-market faster

NMT Credits

save on credits, and spend only on selective content that requires NMT

Effective Word Count

outsource effective word count by applying translation memory to increase efficiency and reduce cost

Enhancement

- ◆ **Indic Typing Tool**
make comments in the 'CAT tool' in a regional language of your choice.
- ◆ **Rate Card**
Revise your rate card effortlessly before project splitting.
- ◆ **Dashboard**
Displays a total number of projects & project value.
- ◆ **Marketplace Application**
Assign projects to LSPs or translators right from the Marketplace application received.
- ◆ **Marketplace Users**
Get a consolidated list of translators & LSP users on the platform.
- ◆ **Team Board**
Get a detailed view of a user's profile before assigning a project.
- ◆ **Project Metrics Filter Option**
Analyse project metrics with advanced filters like language, service, status, & user.
- ◆ **Translated String Report**
download report selecting the specific user by applying user filter.
